

Chief Financial Officer -- Position Description

MANDATE CONTEXT

This is a backfill mandate. The incumbent CFO is relocating overseas at the end of the quarter and the board wants continuity of the finance function through the upcoming refinancing round. Internal context: the outgoing CFO has agreed to a two-month handover window. Discretion is requested until an offer is signed, as the departure has not yet been announced internally.

IDEAL PROFILE

We are looking for a commercially minded, hands-on Chief Financial Officer who has already run the finance function of a group of a similar size and complexity, and who is comfortable sitting on the executive committee and presenting directly to the board and to external lenders.

REPORTING STRUCTURE

The role reports to the Group Chief Executive Officer. The CFO will have five direct reports and lead a finance organisation of roughly forty people. The role is based in Dubai, United Arab Emirates.

EMPLOYMENT AND PACKAGE

This is a full-time, permanent position, with a target start date of 15 September 2026. The base salary range is AED 500,000 to AED 650,000 per month. The notice period required is three months. Bonus target is 35 percent of base salary. LTIP: eligible for long-term incentive after twelve months of service.

Benefits and allowances include a housing allowance, an annual home leave allowance, and school fees for up to two children.

CANDIDATE REQUIREMENTS

Required: significant experience reporting directly to a board and to external lenders or investors.

Required: proven experience leading IFRS-based financial reporting and internal controls for a group of comparable scale.

Preferred: fluency in Arabic.

Preferred: prior exposure to a debt refinancing or capital markets transaction.

COMPETENCY WEIGHTING

On the technical side, the strongest weight should go to financial reporting and controls, closely followed by treasury and capital markets experience, with board and investor relations and M&A or restructuring experience carrying a somewhat smaller share each.

On the behavioural side, strategic leadership and stakeholder influence should carry the most weight, with change management and resilience under ambiguity somewhat less heavily weighted.
